

.....
"Knowing where we are helps us prioritize our efforts to improve our security posture," says one member on why they participated in the **CYBERFIT**[®] Benchmarking Service.
.....

Our **NH-ISAC** community is as diverse as the health care industry, ranging from smaller charitable organizations to large global corporations. **CYBERFIT**[®] leverages this community to enable preferential pricing for security services.

NH-ISAC Current Membership

- Providers **30%**
- Insurance & Payers **21%**
- Pharma/Biotech **15%**
- Acadamia **12%**
- HIT - Information **10%**
- Medical Device **9%**
- Pharmacy **3%**

National Health Information Sharing and Analysis Center (NH-ISAC) is the official health care information sharing and analysis center.

NH-ISAC is a non-profit, member-driven organization offering health care stakeholders a trusted community and forum for sharing cyber and physical threat Indicators, vulnerabilities, best practices and mitigation strategies.

Why **CYBERFIT**[®]?

- Online questionnaire in six comprehensive categories
- Reports highlight gap % to peers and graphs detail results

Security Operations Services

Membership Preferred Rate

- Penetration Testing
- One-Time Vulnerability Scan
- Vulnerability Management
- Malware Analysis
- Incident Management Retainer
- Web Application Testing

Serving the NH-ISAC Community

The goal of **CYBERFIT**[®] is to provide all health care organizations with access to cyber capabilities that may be currently out of reach because of limited resources. Our members will reap the benefits of shared health care-specific cybersecurity intelligence, collective purchasing power and the opportunity to augment their own cybersecurity resources.

Legal & Regulatory Surveillance

Complimentary to all Members

- Periodic health care-related updates on regulation, legislation and current key court rule changes
- Updates and key alerts at global, federal, and local levels
- Brief news updates in easy to consume, non-legal language, provided in easy email format

Shared Risk Assessments

Membership Preferred Rate

- Provides automated evidence collection & risk assessments designed for the health care industry to measure third party vendors for security and data risk
- Access to comprehensive vendor repository evidence is immediately available to apply to your own risk assessment processes and practice
- Automated vendor monitoring
