

.....
"Knowing where we are helps us prioritize our efforts to improve our security posture," says one member on why they participated in the **CYBERFIT**® Benchmarking Service.
.....

Our **NH-ISAC** community is as diverse as the health care industry, ranging from smaller charitable organizations to large global corporations. **CYBERFIT**® leverages this community to enable preferential pricing for security services.

NH-ISAC Current Membership

- Providers **30%**

- Academia **12%**
- HIT - Information **10%**
- Medical Device **9%**
- Pharmacy **3%**

National Health Information Sharing and Analysis Center (NH-ISAC) is the official health care information sharing and analysis center.

NH-ISAC is a global, non-profit, member-driven organization offering health care stakeholders a trusted community and forum for collaborating and sharing cyber and physical threat Indicators, vulnerabilities, best practices and mitigation strategies with each other. Members use this information to extend their security operations team and to create situational awareness, inform risk-based decision-making and mitigate against threats.
